EDUCATION

Netaji Subhas University of Technology, Delhi

B.Tech in Computer Science – Big Data Analytics (CSDA)

Aug. 2023 – Present

St. Karen's High School

Class XII – CBSE

2022

St. Karen's High School

Class X – CBSE

2020

EXPERIENCE

Software Engineer Intern | Encore Ascend

July 2026 – August 2026 [View Certificate](#)

- Redesigned and enhanced the company website using Next.js, translating Figma designs into responsive, reusable components while following frontend best practices such as component-driven architecture, dynamic imports, and code splitting.
- Developed a public resource library with search, filtering, pagination, and downloads, enabling users to efficiently discover and access company resources; built supporting Express.js REST APIs for resource management and delivery.
- Implemented server-side rendering (SSR) for content-driven pages to improve SEO and search-engine crawlability, and integrated Firebase Authentication for secure user authentication and access management.

PROJECTS

AI Life OS – AI-Powered Productivity Platform | React, Node.js, Express, MongoDB, Groq LLM

[Live Demo](#)

- Built a full-stack MERN productivity platform with **30+ RESTful APIs across 11 modules** covering tasks, goals, calendar, notes, study sessions, flashcards, analytics, and AI-powered features.
- Integrated the **gpt-oss-20b model via Groq** to deliver **4 AI capabilities** – context-aware chat, goal-roadmap generation, note summarization, and quiz generation – using structured JSON outputs and dynamic context aggregated from **7 MongoDB collections**.
- Implemented **JWT authentication, bcryptjs hashing**, and resource ownership checks across **10 data models**; built a **React SPA** with Context API, Axios interceptors, keyboard shortcuts, and PDF ingestion.

Homely – Vacation Rental Booking Platform | React, Node.js, Express, MongoDB, Razorpay, Cloudinary

[Live Demo](#)

- Architected a scalable MERN platform with **44+ REST APIs across 7 domains**, using **MVC architecture**, Swagger/OpenAPI documentation, and centralized error handling.
- Prevented **double-booking race conditions** using **MongoDB ACID transactions** and interval-overlap validation; optimized search with **5 compound/text indexes** for sub-100ms query performance.
- Implemented **JWT authentication and RBAC** for Guest/Host/Admin roles, with **bcrypt** password hashing, rate limiting, Helmet CSP, and input validation using **express-validator**.
- Integrated **Razorpay payments** with HMAC-SHA256 signature verification and idempotent webhooks; deployed the application using **Vercel serverless functions** and **Cloudinary CDN**.

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6), Python, SQL

Frontend: React.js, HTML5, CSS3, SCSS, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Machine Learning & AI: Scikit-Learn, NLP, Generative AI, RAG, Agentic AI

Libraries & Frameworks: React Router DOM, Framer Motion

Tools: Git, GitHub, VS Code, Postman, Vite

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, API Integration, State Management

ACHIEVEMENTS

- Amazon ML Challenge 2025: Secured (**Top 3%**) by building a predictive pricing model achieving a Best **SMAPE of 55.72**.
- Member of the **NSUT Cricket Team** (2023–Present), representing the university in tournaments while developing teamwork, leadership, and communication skills.
